

eyebase

smartest digital asset management

Think you can't live without Dropbox?

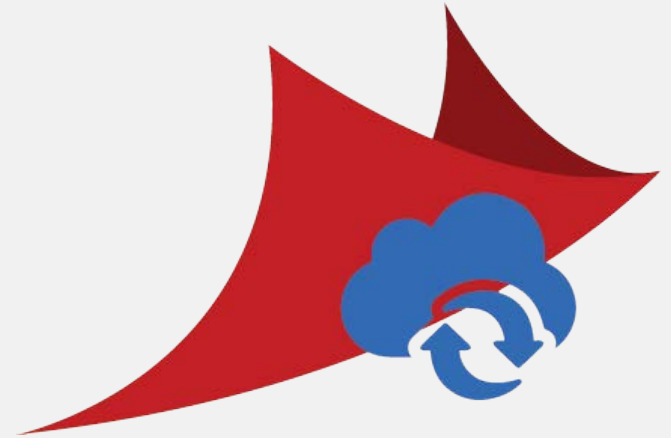

- ✓ Dropbox synchronizes files from several devices.
- ✓ Unfortunately also the chaos of unsorted files, unknown or multiple uncurrent versions are being synchronized.
- ✓ There is only one single thing worse than a chaos. Which is a chaos in several places.

200 mio Dropbox users are best proof of the need for file synchronization

eyeSync uses exactly that concept and introduces file synchronization between controlled files and your devices.

eyeSync is the answer.

- ✓ eyeSync is an add-on module to eyebase.
- ✓ An eyebase folder can be synchronized with a local folder with a single click.
- ✓ Files being put into the synced eyebase folder will be distributed to all local eyeSync folders instantaneously.
- ✓ Files saved locally into the eyeSync folder will be imported into eyebase automatically.
- ✓ File collisions are being detected.

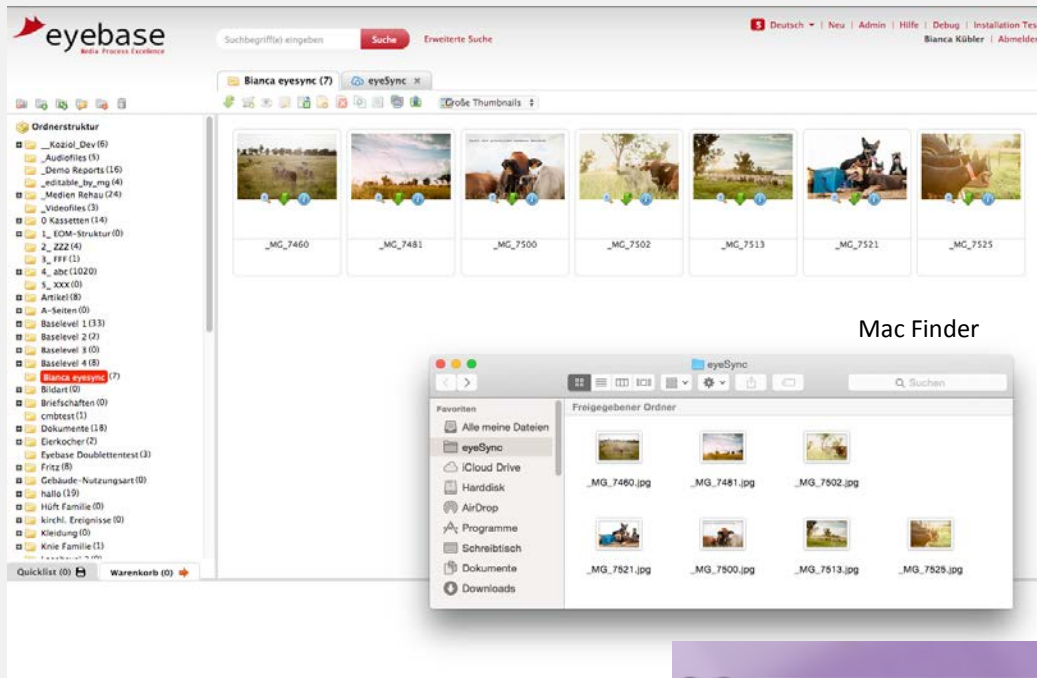

eyeSync and the local file system.

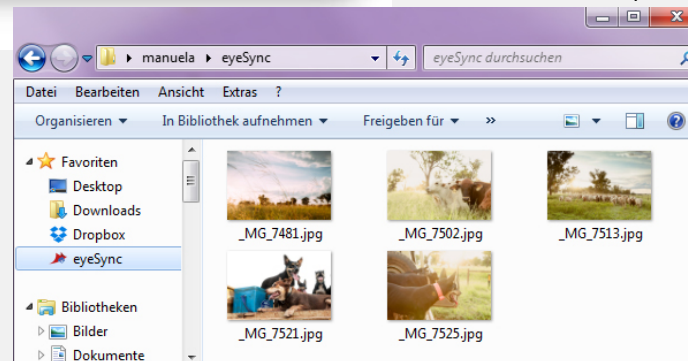

- ✓ eyeSync can be installed on your local Mac or PC from an installation menu in eyebase (if the eyeSync module has been activated). On both platforms, eyeSync seamlessly integrates with the operating system. Status indication can be seen at the small icon in the system bar.
- ✓ eyeSync automatically synchronizes files in the synced eyebase folder and in all synced local folders.
- ✓ Files are being managed centrally and can be made available locally.

eyeSync and the local file system.

Windows Explorer

- ✓ The same content is shown in the eyebase folder and in the local folder.
- ✓ Changes are being synchronized immediately.

eyeSync. The price.

- ✓ eyeSync Server License € 1.490.-
 - ✓ eyeSync Plugin with installation guideline

- ✓ eyeSync per User € 190.-
